EDUCATION

McGill University - Bachelor of Science
Honours Statistics and Computer Science

Montreal, QC
Sep 2024 - May 2027

GPA: 3.92

Relevant Coursework : Theory of Machine Learning, Database Systems, High Dimensional Probability

EXPERIENCE

Mila

Montreal, QC

Research Intern (under [Boris Knyazev](#))

Aug 2026 - Jan 2027

- Working on improving **Samsung SAIL's Nino**
- Designing an architecture for distributed GNN inference on GPUs to allow greater model complexity
- Increased the size of the training dataset by 2x by re-writing scripts on Mila's **HPCs**

TD Insurance

Montreal, QC

Analytics Intern

May 2026 - Aug 2026

- Developed **Explainable Boosting Machine (EBM) models** to model Loss Cost for residential claims
- Rewrote internal pipelines in **Spark** with up to 60x speed ups
- Wrote model performance and explainability modules using **MLFlow**

Mila (Complex Data Lab)

Montreal, QC

Research Intern (under [Reihaneh Rabbany](#))

Jan 2026 - Apr 2026

- Co-authored the [OpenFake dataset paper](#), currently under review for the **NeurIPS 2026** Datasets and Benchmarks track
- Engineered an **automated data pipeline** to detect and prompt open-source models, maintaining a continuous dataset
- Wrote SLURM batch scripts to automate job queues and **manage compute workloads across offline GPU clusters**

TD Insurance

Montreal, QC

Actuary Intern

May 2025 - Aug 2025

- Wrote a data pipeline to generate **Univariate Analysis** reports to save multiple hours per month
- Analyzed policies to ensure adequate pricing of the book using **Excel** and **Pandas** (Python)
- Data analysis with **Python**, **Excel**, **VBA** through **Databricks** and **Microsoft Azure**

PROJECTS

DegreeViz - [Project link](#) - [Source Code](#)

- Hosting **over 500 monthly users** at launch
- Wrote an automated **web scraping** pipeline for McGill's systems
- Hosting **PRE** and **PROD** environments, with **Github Actions** for **CI/CD** integration and **Rulesets**
- Integrated **PostgreSQL** and **OAuth** with Supabase

SAVMO - [Source Code](#) - [Hackathon Submission](#)

- Packaged the project in a **Docker** container for future deployment
- Implemented **multi-processing** to handle **concurrent streams of live detection**
- **Won the McGill AI Hackathon**, in the Best Hack for Impact Category

SKILLS

Technical: Deep Learning, PyTorch, TensorFlow, Scikit-learn, Numpy, Mathematics, Statistics, Docker, Excel, Git, Pandas, Matplotlib, AWS, MLFlow, Java, JavaScript, R, NLP, LLM, RAG, Spark, Keras, Office365

Soft Skills: Collaboration, Leadership, Project Management, Analytical Thinking, Problem Solving, Strategic Planning, Critical Thinking, Self-Starting, Adaptability, Critical Decision Making, Mentoring, Team Player

ADDITIONAL

Languages: Fluent in French, Fluent in English and Fluent in Russian
