EDUCATION

McGill University - Bachelor of Science
Honours Statistics and Computer Science

Montreal, QC
Sep 2024 - May 2027

GPA: 3.92

Relevant Coursework : Theory of Machine Learning, Database Systems, High Dimensional Probability

EXPERIENCE

TD Insurance

Montreal, QC

Analytics Intern

May 2026 - Aug 2026

- Developed **Explainable Boosting Machine (EBM)** models to model Loss Cost for residential claims
- Developed automated pipelines for training and testing models
- Wrote model performance and explainability modules using **MLFlow**

Complex Data Lab (Mila)

Montreal, QC

Research Intern in Artificial Intelligence

Jan 2026 - Apr 2026

- Co-authored the [OpenFake dataset paper](#), currently under review for the **NeurIPS 2026** Datasets and Benchmarks track
- Engineered an **automated data pipeline** to detect and prompt open-source models, maintaining a continuous dataset
- Wrote SLURM batch scripts to automate job queues and **manage compute workloads across offline GPU clusters**

TD Insurance

Montreal, QC

Actuary Intern

May 2025 - Aug 2025

- Wrote a data pipeline to generate **Univariate Analysis** reports to save multiple hours per month
- Analyzed policies to ensure adequate pricing of the book using **Excel** and **Pandas** (Python)
- Data analysis with **Python**, **Excel**, **VBA** through **Databricks** and **Microsoft Azure**

Blinkay Mobility

Montreal, QC

Support Team Leader

Jan 2022 - May 2024

- Saved the company up to **5,000\$ per month** by finding internal bugs in the system
- Managed **Jira** story boards and **Confluence pages** of the team to ensure smooth onboarding and team momentum
- **Managed a team** of up to 5 people

PROJECTS

DegreeViz - [Project link](#) - [Source Code](#)

- Hosting **over 500 monthly users** at launch
- Wrote an automated **web scraping** pipeline for McGill's systems
- Hosting **PRE** and **PROD** environments, with **Github Actions** for **CI/CD** integration and **Rulesets**
- Integrated **PostgreSQL** and **OAuth** with Supabase

SAVMO - [Source Code](#) - [Hackathon Submission](#)

- Packaged the project in a **Docker** container for future deployment
- Implemented **multi-processing** to handle **concurrent streams of live detection**
- **Won the McGill AI Hackathon**, in the Best Hack for Impact Category

SKILLS

Technical: Deep Learning, PyTorch, TensorFlow, Scikit-learn, Numpy, Mathematics, Statistics, Docker, Excel, Git, Pandas, Matplotlib, AWS, MLFlow, Java, JavaScript, R, NLP, LLM, RAG, Power BI, Keras, Office365

Soft Skills: Collaboration, Leadership, Project Management, Analytical Thinking, Problem Solving, Strategic Planning, Critical Thinking, Self-Starting, Adaptability, Critical Decision Making, Mentoring, Team Player

ADDITIONAL

Languages: Fluent in French, Fluent in English and Fluent in Russian
